Han Myat Thu

Full Stack Developer

👤 Profile

I am a software developer who has passion in software development. I started my career with PHP and Laravel framework in 2016. Later, I found out that I was more comfortable with JavaScript so I deeply follow these technologies. My tech skills are mainly web application development with JavaScript, TypeScript, Node, React, Vue, Nuxt, Angular and mobile application development with React-Native and Ionic. I am also interested and passionate about BlockChain and Solidity. I aslo have experience with cloud technologies such as AWS, Azure and Firebase.
